Minor Changes

- Provision made to Surrender Softlock from BUSY itself. Available as Company→License

 Management→Surrender Softlock License.
- A new option 'Print 'Duplicate Copy' while re-printing Sales Invoice' provided. If enabled, whenever a sales invoice is re-printed, 'Duplicate Copy' will be printed instead of 'Original Copy'.

 Available as Administration→Configuration→Features/Options→General.
- Forms Received voucher, two new fields 'Issuing Office' & 'Form Series' provided as same were required in VAT reports.
- While generating PO from report(s) like Reorder Level or Production Planning, till now option was available raise order *w.r.t.* deficit quantity only. Now provision made to pick absolute order quantity from some item master field like Maximum Level or Optional fields.

 Few fields in Account/Item master were not available for import through Excel. Now those fields made available.

 Budget Variance report was being show for all the 12 months. Now provision made to show for month range also.

Bugs Removed

- Nepali date enabled and option to pick 'System date as voucher date' enabled, an error was being generated while feeding voucher in SQL mode. Now problem rectified.

- Item barcode printing, fields related to 'Purchase Bill Date' was generating error if date was not specified in proper format. Now problem rectified.

- If re-printing of documents was not allowed for user, print preview was being considered as printing and user was not able to take print out later on. Now problem rectified.
- While sending email/sms, if default printer driver was not found an error was being generated. Now problem rectified.
- Date-wise pricing enabled; while feeding Party-Item wise pricing, sometimes an error was being generated. Now problem rectified.
- Party-wise sales analysis for sale vouchers only; on pressing <ENTER> on any party, sales return vouchers were also being shown. Now problem rectified.
- Printing account labels, sometimes an error was being generated. Now problem rectified.
- Auto generating challan from orders, improper challan references were being generated. Now problem rectified.
- Configurable list of Employee masters, some irrelevant fields were being shown in the list. Now problem rectified.
- Stock ageing report was not working properly for a branch. Now problem rectified.
