

Product Release Information

From	:-	Mktg Deptt	To	:-	All
Product	:-	BUSY	Version	:-	16 (Rel 3.1)
Compilation Date	:-	18.03.2016	Document Date	:-	18.03.2016

Statutory Changes

- Tamilnadu VAT eReturn in XML format provided.
- Minor changes in Rajasthan Form Submission eReturn.

Minor Changes

- New field 'IE Code' added in Account Master.
- New field 'Country' added in Account Master in case of state Tamilnadu. Required in Tamilnadu VAT eReturn.

Bugs Removed

- Custom validations connected with item grid in inventory vouchers were not working. Problem started from version 3.0. Now problem rectified.
- Branch management enabled; users not connected with any branch were not able to feed 'Adjust Excise Voucher' for a specific branch. Now problem rectified.
- Bulk Account Updation utility, fields 'Default Cheque Printing Name' & 'Default Cheque Format Name' were not being updated in Account. Now problem rectified.
- HO/BO data synchronisation; auto synchronisation at the time of opening/closing company was not working properly. Now problem rectified.
- Data path set in BUSY 16 was not being recognised in BUSY 14. Now problem rectified.
- If BOM was defined in Alt. unit of item then at the time of production voucher, price of raw material was not being picked properly. Now problem rectified.
- RG-1 generated for a Tariff Heading was not showing any data. Now problem rectified.
- Pending Order report was sometimes showing an error 'Overflow'. Now problem rectified.
- Sales Analysis generated for selected vouchers and option to show VAT enabled, an error was being generated. Now problem rectified.

Busy

- Physical Stock voucher; if quantity for some item was being generated in Alt. unit then the price for the same was not being picked properly. Now problem rectified.
- Party-Item pricing configuration, Item name column was small and full Item name was not being shown. Now problem rectified.
- Importing Items from Excel along with Op. Stock in Alt. Unit; Op. Stock was not being imported. Now problem rectified.
- 'Production Planning' report generated for multiple level BOM was sometimes showing incorrect data. Now problem rectified.
